

ETS PRODUCTS

- EFFICIENCY
- SECURITY

ETS

The ETS system is equipped with all necessary features to help you **manage your fleet** efficiently.

Thanks to advanced **shock detection** algorithms, **battery** monitoring system and a complete analysis of the **vehicle efficiency**, it is possible to always get **real-time information** on your fleet status.

With the ETS system you can authorize to use your vehicles by unique RFID, allowing to automatically receive on the remote-control cloud system useful information about **driving-style**, **usage time** and **accidents** happened during the working hours.

FEATURES

-  SATELLITE TRACKING
-  DATA TRANSMISSION WITH SIM/4G /WIFI
-  SHOCK SENSOR
-  ACCESS CONTROL
-  BATTERY ANALYSIS

ETS TOUCH

Thanks to the ETS TOUCH system, drivers can fill out a **pre-operational checklist** that allows them to know the status of the vehicle before starting their work shift.

If the ETS TOUCH system detects any anomalies it can **block the vehicle** and the driver can ask for an extraordinary maintenance intervention through the touch display.

The car owner receives a **real-time notification** with the information about the detected problem to speed up the vehicle repair operations.

Thanks to the touch display it is also possible to send messages directly from the cloud and getting access to the **tax benefits** granted by the "Intelligent Factories".

FEATURES

|  SATELLITE TRACKING |  BATTERY ANALYSIS |
|  DATA TRANSMISSION WITH SIM/4G/WIFI |  CHECK LIST |
|  SHOCK SENSOR |  ANOMALIES NOTIFICATION |
|  ACCESS CONTROL |  MESSAGING SYSTEM WITH DRIVERS |

ETS SAFETY

The KIT ETS Safety grants an improvement in terms of **fleet efficiency** and a high level of **security** in the industrial environment. The KIT includes the ETS Touch and a Safety solution.

Kiwitron offer the possibility to choose between different types of products. Each of them is available also in the Stand-Alone version: Anticollision, Lane Radar and Kiwi-eye.

Anticollision for forklifts and pedestrian

FEATURES

- 🔊 VIBRATION
- 🔊 ACOUSTIC SIGNAL
- 💡 LIGHT INDICATOR
- ⚡ WIRELESS CHARGING
- 📶 PENETRATES OBSTACLES
- 🎯 ETS INTEGRATED
- 🚗 AUTOMATIC SLOWDOWN SYSTEM
- 🔑 KEYLESS FUNCTION
- 📍 2 DETECTION ZONES

The system **avoid the collision** between forklift and pedestrian and between forklifts.

The driver is warned by the **automatic slow-down system** and an acoustic **signal**; while the pedestrian is warned by an acoustic and vibrant signal.

Installed on the vehicle and integrated with the ETS Touch, the driver can visualize the status of the surrounding area on the touch display.

Lane Radar

FEATURES

- 📍 2 DETECTION ZONES
- 🚗 AUTOMATIC SLOWDOWN SYSTEM
- 💡 DETECTS OBSTACLES
- 📶 LANE MODALITY
- 🎯 ETS INTEGRATED

The system allows to **detect any obstacles** in the environment (pedestrians or assets).

The device warns the operator with an acoustic and lighting **signal** and can activate the **automatic slowdown system**.

Installed on the vehicle and integrated with the ETS Touch, the driver can visualize the status of the surrounding area on the touch display.

Kiwi-eye Smart Camera

FEATURES

- 👤 DETECTS PEDESTRIAN
- 🚗 AUTOMATIC SLOWDOWN SYSTEM
- 📺 CONTROL DISPLAY
- 🧠 ARTIFICIAL INTELLIGENCE
- 📷 MULTICAMERA
- 📍 3 DETECTION ZONES
- 🎯 ETS INTEGRATED

The system with artificial intelligence **detects vehicles and people moving in the area**, bends down pedestrians and people from behind.

Kiwi-eye identifies the distance between the vehicle and the pedestrian, **automatically slowing down the vehicle** if there is a risk of collision.

It is possible to visualize the status of the surrounding area on the included **display touch**.

WHY DO I CHOOSE KIWITRON?

Mission

Our mission is to spread innovation and bring technological advances at the service of companies.

Innovation

Kiwitron's team will follow you in the digitalization process, developing products built to be improved over time.

Safety

Kiwitron is engaged in developing customizable safety systems.

Experience

Kiwitron is expert in the field of Industry 4.0 to bring a real competitive advantage to companies.

Trustworthiness

Our products are developed to offer the best solution any time.
